

Making your support needs a priority. Together.

A guide to the personalized support resources available
from Pfizer Oncology Together™

EXPLORE WHAT'S POSSIBLE.

XALKORI is a prescription medicine used to treat people with non-small cell lung cancer (NSCLC) that has spread to other parts of the body and is caused by a defect in either a gene called ALK (anaplastic lymphoma kinase) or a gene called ROS1. It is not known if XALKORI is safe and effective in children.

Please see Important Safety Information on pages 5-6.
Click for the [full Prescribing Information](#) and [Medication Guide](#) or visit [XALKORI.com](https://www.XALKORI.com).

*Making your support needs a priority. **Together.***

At Pfizer Oncology Together™, we treat your individual needs as a priority. We'll help you identify financial assistance options so you can get your prescribed XALKORI® (crizotinib). We can also connect you with a dedicated Care Champion who has social work experience and will offer resources that may help with some of your day-to-day challenges. Because when it comes to support, we're in this together.

■ Financial Assistance

Finding financial support options. Together.

Pfizer Oncology Together can help you understand your insurance and identify what financial support may be available for your XALKORI prescription. In addition, we can help find a specialty pharmacy that can fill your prescription.

COMMERCIALLY INSURED

Resources for eligible commercial, private, employer, or state health insurance marketplace coverage:

- Co-pay assistance: Eligible, commercially insured patients may pay as little as \$0 per month for XALKORI. Limits, terms, and conditions apply.* There are no income requirements, forms, or faxing to enroll

*Patients are not eligible to use this card if they are enrolled in a state or federally funded insurance program, including but not limited to Medicare, Medicaid, TRICARE, Veterans Affairs health care, a state prescription drug assistance program, or the Government Health Insurance Plan available in Puerto Rico. Patients may receive up to \$25,000 in savings per product annually. **The offer will be accepted only at participating pharmacies. This offer is not health insurance.** No membership fees apply. Pfizer reserves the right to rescind, revoke, or amend this offer without notice. For full Terms and Conditions, please see PfizerOncologyTogether.com/terms. For any questions, please call 1-877-744-5675, visit PfizerOncologyTogether.com/terms or write: Pfizer Oncology Together Co-Pay Savings Program, 2250 Perimeter Park Drive, Suite 300, Morrisville, NC 27560.

MEDICARE/GOVERNMENT INSURED

Help identifying resources for eligible patients with Medicare/Medicare Part D, Medicaid, and other government insurance plans:

- Assistance with searching for financial support from independent charitable foundations. These foundations exist independently of Pfizer and have their own eligibility criteria and application processes. Availability of support from the foundations is determined solely by the foundations
- Financial assistance through Extra Help, a Medicare Part D Low-Income Subsidy (LIS) program
- Free medicine†

UNINSURED

Help identifying resources for eligible patients without any form of healthcare coverage:

- Help finding coverage
- Free medicine through the Pfizer Patient Assistance Program, or at a savings through the Pfizer Savings Program‡

†If support from independent charitable foundations or Medicare Extra Help is not available, Pfizer Oncology Together will provide eligible patients with medication for free through the Pfizer Patient Assistance Program. The Pfizer Patient Assistance Program is a joint program of Pfizer Inc. and the Pfizer Patient Assistance Foundation™. The Pfizer Patient Assistance Foundation is a separate legal entity from Pfizer Inc. with distinct legal restrictions.

‡The Pfizer Savings Program is not health insurance. For more information, call the toll-free number 1-877-744-5675. There are no membership fees to participate in this program. Estimated savings are 50% and depend on such factors as the particular drug purchased, amount purchased, and the pharmacy where purchased.

XALKORI® (CRIZOTINIB) PERSONALIZED PATIENT SUPPORT

■ Personalized Patient Support

Care Champion Support

At Pfizer Oncology Together, our Care Champions, who have social work experience, can provide you resources that may help with some of your day-to-day challenges*

*Some services are provided through third-party organizations that operate independently and are not controlled by Pfizer. Availability of services and eligibility requirements are determined solely by these organizations.

EMOTIONAL SUPPORT

We can connect you to diagnosis-specific support groups, an independent organization that offers short-term counseling, and a free app, developed by Pfizer Oncology, to help patients connect with loved ones and ask for the support they need.

EDUCATIONAL SUPPORT

To help support your overall health and well-being, we've created resources about physical and mental health, as well as nutrition tips and healthy recipes

developed in partnership with dietitians who specialize in oncology nutrition. We can also provide you with information to help you understand your prescribed XALKORI.

PRACTICAL SUPPORT

If you need assistance with transportation or lodging for treatment-related appointments, we'll connect you to independent organizations that offer these services for free to qualifying patients.

And if you're leaving work for a period of time during treatment, or preparing to return to work, we can send you information to help make the transition easier.

■ Important Safety Information

XALKORI® (crizotinib) may cause serious side effects, some of which may include:

Liver problems — XALKORI may cause life-threatening liver injury that may lead to death. Your healthcare provider should do blood tests to check your liver every 2 weeks during the first 2 months of treatment with XALKORI, then once a month. Tell your healthcare provider right away if you get any of the following new or worsening symptoms:

- yellowing of your skin or the white part of your eyes
- severe tiredness
- dark or brown (tea color) urine
- nausea or vomiting
- decreased appetite
- pain on the right side of your stomach
- bleed or bruise more easily than normal
- itching

Lung problems (pneumonitis) — XALKORI may cause life-threatening lung problems that may lead to death. Symptoms may be similar to those symptoms from lung cancer. Tell your healthcare provider right away if you have any new or worsening symptoms, including:

- trouble breathing or shortness of breath
- cough with or without mucous
- fever

Heart problems — XALKORI may cause very slow, very fast, or abnormal heartbeats. Your healthcare provider may check your pulse rate and blood pressure during treatment with XALKORI. Tell your healthcare provider right away if you feel dizzy or faint or have abnormal heartbeats. Tell your healthcare provider if you take any heart or blood pressure medicines.

Severe Vision problems — Vision problems are common with XALKORI. These problems usually happen within 1 week of starting treatment with XALKORI. Vision problems with XALKORI can be severe and may cause partial or complete loss of vision in one or both eyes. Your healthcare provider may hold or stop XALKORI and refer you to an eye specialist if you develop any vision problems during treatment with XALKORI. Tell your healthcare provider right away if you have any new vision problems, loss of vision or any change in vision, including:

- double vision
- seeing flashes of light
- blurry vision
- light hurting your eyes
- new or increased floaters

Before you take XALKORI, tell your healthcare provider about all of your medical conditions including if you:

- have liver or kidney problems
- have lung problems
- have heart problems, including a condition called long QT syndrome
- have vision or eye problems

■ Important Safety Information (continued)

Before you take XALKORI, tell your healthcare provider about all of your medical conditions including if you:

- are pregnant, or plan to become pregnant.
XALKORI can harm the unborn baby
 - **Females** who are able to become pregnant should use effective birth control during treatment with XALKORI and for at least 45 days after the final dose of XALKORI.
 - Your healthcare provider will check to see if you are pregnant before starting treatment with XALKORI
 - **Males** who have female partners who can become pregnant should use condoms during treatment with XALKORI and for at least 90 days after the final dose of XALKORI.
 - Talk to your healthcare provider about birth control methods that may be right for you.
 - If you or your partner becomes pregnant, tell your healthcare provider right away.
- are breastfeeding or plan to breastfeed. It is not known if XALKORI passes into the breast milk. Do not breastfeed during treatment with XALKORI and for 45 days after the final dose. Talk to your healthcare provider about the best way to feed the baby during this time.

Tell your healthcare provider about the medicines you take, including prescription medicines, over-the-counter medicines, vitamins, and herbal supplements.

Do not drink grapefruit juice, eat grapefruit or take supplements containing grapefruit extract during treatment with XALKORI. It may increase the amount of XALKORI in your blood to a harmful level.

The most common side effects of XALKORI include:

- vision problems
- nausea, diarrhea, or vomiting
- swelling of your hands, feet, face, and eyes
- constipation
- increased liver function blood test results
- tiredness
- decreased appetite
- upper respiratory infection
- dizziness
- feeling of numbness or tingling in your arms or legs

XALKORI can cause changes in vision, dizziness, and tiredness. Do not drive or operate machinery if you have any of these symptoms.

Avoid spending prolonged time in sunlight. XALKORI can make your skin sensitive to the sun (photosensitivity), and you may burn more easily. You should use sunscreen and wear protective clothing that covers your skin to help protect against sunburn if you have to be in the sunlight during treatment with XALKORI.

XALKORI may cause fertility problems in females and males, which may affect the ability to have children.

These are not all of the possible side effects of XALKORI.

Call your doctor for medical advice about side effects. You may report side effects to the FDA at 1-800-FDA-1088.
